### III. BACKGROUND

#### CPNI Investigation

3. Section 222 imposes the general duty on all telecommunications carriers to protect the confidentiality of their subscribers’ proprietary information.<sup>8</sup> The Commission has issued rules implementing section 222 of the Act.<sup>9</sup> The Commission required carriers to establish and maintain a

<sup>8</sup> Section 222 of the Communications Act, 47 U.S.C § 222, provides that: “Every telecommunications carrier has a duty to protect the confidentiality of proprietary information of, and relating to, other telecommunications carriers, equipment manufacturers, and customers, including telecommunication carriers reselling telecommunications services provided by a telecommunications carrier.” Prior to the 1996 Act, the Commission had established CPNI requirements applicable to the enhanced services operations of AT&T, the Bell Operating Companies (“BOCs”), and GTE, and the customer premises equipment (“CPE”) operations of AT&T and the BOCs, in the Computer II, Computer III, GTE Open Network Architecture (“ONA”), and BOC CPE Relief proceedings. *See Implementation of the Telecommunications Act of 1996: Telecommunications Carriers’ Use of Customer Proprietary Network Information and Other Customer Information and Implementation of Non-Accounting Safeguards of Sections 271 and 272 of the Communications Act of 1934, as amended*, CC Docket Nos. 96-115 and 96-149, Second Report and Order and Further Notice of Proposed Rulemaking, 13 FCC Rcd 8061, 8068-70, para. 7 (1998) (“CPNI Order”) (describing the Commission’s privacy protections for confidential customer information in place prior to the 1996 Act.

system designed to ensure that carriers adequately protected their subscribers' CPNI. Section 64.2009(e) is one such requirement. In 2006, some companies, known as "data brokers," advertised the availability of records of wireless subscribers' incoming and outgoing telephone calls for a fee.<sup>10</sup> Data brokers also advertised the availability of certain landline toll calls.<sup>11</sup> On April 2, 2007, the Commission strengthened its privacy rules with the release of the *EPIC CPNI Order*,<sup>12</sup> which adopted additional safeguards to protect CPNI against unauthorized access and disclosure. The *EPIC CPNI Order* was directly responsive to the actions of databrokers, or pretexters, to obtain unauthorized access to CPNI.<sup>13</sup> The *EPIC CPNI Order* requires that all companies subject to the CPNI rules file annually, on or before March 1, a certification with the Commission pursuant to amended rule 47 C.F.R. § 64.2009(e).<sup>14</sup> Additionally, companies must now provide, with their certification, "an explanation of any actions taken against data brokers and a summary of all customer complaints received in the past year concerning the unauthorized release of CPNI."<sup>15</sup>

4. **GIT Investigation (EB-08-TC-4005)**: A number of companies failed to comply with the annual certification filing requirement and did not file compliance certifications on or before March 1, 2008, for the 2007 calendar year. GIT was one of those companies.<sup>16</sup> As a result, the Bureau sent a Letter of Inquiry to GIT and the other companies, asking them to provide copies and evidence of its annual CPNI certification filings.<sup>17</sup> GIT failed to submit satisfactory evidence of its timely filing of its annual CPNI certifications.<sup>18</sup> GIT ultimately filed its 2007 CPNI certification on September 10, 2008.<sup>19</sup> In its *Omnibus Notice of Apparent Liability for Forfeiture*, the Bureau determined that as a result of GIT's

The carrier must provide a statement accompanying the certification explaining how its operating procedures ensure that it is or is not in compliance with the rules in this subpart. In addition, the carrier must include an explanation of any actions taken against data brokers and a summary of all customer complaints received in the past year concerning the unauthorized release of CPNI. failure to file annual CPNI certifications, GIT (and the other companies) was in apparent violation of section 222 of the Act, section 64.2009(e) of the Commission's rules, and the Commission's *EPIC CPNI Order*. On March 10, 2009, GIT filed its response to the Omnibus NAL.<sup>20</sup>

### Universal Service Investigation

5. The Commission's rules require that entities providing interstate telecommunications services and certain other providers of interstate telecommunications contribute to the federal universal service fund ("USF") based upon their interstate and international end-user telecommunications revenues.<sup>21</sup> The Commission does not require contributors to recover their universal service contributions from their customers.<sup>22</sup> Instead, the Commission allows contributors to recover their universal service contributions from their customers, subject to certain requirements.<sup>23</sup> Specifically, section 54.712 of the Commission's rules provides that contribution costs passed through to end-user customers as federal universal service line-item charges may not exceed the interstate telecommunications portion of the customers' bills multiplied by the relevant contribution factor.<sup>24</sup> In addition, section 201(b) requires that all carrier charges, practices, classifications, and regulations "for and in connection with" interstate communications services be just and reasonable, and gives the Commission jurisdiction to enact rules to implement that requirement.<sup>25</sup>

6. **GIT Investigation (EB-08-IH-0615)**: GIT offers interstate telecommunications services, primarily satellite services, and is subject to the requirements discussed above. On March 17, 2008, the Bureau sent a Letter of Inquiry ("LOI") to GIT inquiring about its compliance with the Commission's universal service filing and contribution rules, as well as its rules relating to the recovery from end-user customers of a common carrier's contributions to the universal service fund, the telecommunications relay service fund, the North American Numbering Plan administration, and local number portability administration.<sup>26</sup> GIT submitted a series of responses between March 25 and April 15,
